

ABSTRACT

TIMEPIECE INCLUDING ANALOGUE TIME DISPLAY MEANS,
ASSOCIATED WITH DAY-NIGHT OR AM-PM INDICATING MEANS

Timepiece including an analogue display (12, 36) arranged such that the hour hand completes one revolution in twelve hours. This analogue display is associated with a coaxial disc (10) driven so as to complete one revolution in twenty-four hours in the same direction as the hour hand. The visible surface (14) of the disc visually
5 defines two half-discs arranged to indicate AM-PM or day-night information relating to the displayed time.
